## mH3 Select INTENSIFIED

The music on this album has been carefully curated for its specific sound character. Each song has been remixed to enhance the listening experience in a surround sound environment. The results are remarkable.

All the songs are well-known in their stereo versions – produced for the traditional one-dimensional listening setting. We have meticulously created surround sound mixes in two-dimensional version (5.1 and 7.1) that greatly enrich the emotional impact and sound quality while preserving the authenticity of the original recordings.

For those who have access to three-dimensional technology, we will soon be providing 9.1 (5.1+4) and 11.1 (7.1+4) mixes that add height speakers to achieve the ultimate immersive sound experience.

Whatever your environment, experience the songs you already love in aural spaces you haven't yet heard.

### Production Team:

producer/surround sound producer: Herbert Waltl // surround sound mixer: Eric Schilling // mastering engineer: Michael Romanowski

assistant engineers: Dann Michael Thompson, Louis Ng

## Production Credits

## mediaHYPERIUM3 (mH3)

mH3-Signature Sound is a digital music service focused on delivering immersive listening experiences to its clients. It produces and offers true artistic surround sound mixes, tailored to specific playback environments. Recordings are offered in different surround mix versions e.g. for the home, automobiles and mobile devices.

## Technical Notes

**FLAC (Free Lossless Audio Codec)** is an open format which allows digital audio to be lossless compressed such that file size is reduced without any information being lost. FLAC is supported by many hardware devices.

**AAC (Advanced Audio Codec)** is a format developed by Fraunhofer. AAC Multichannel is native part of Android 4.1 and iOS (stereo downmix). It is also supported in every leading OS, by HTML 5 browsers and most media players: Windows 7/8, Mac OS, Internet Explorer 9, Safari & Chrome, Microsoft Media Player, Winamp, etc. It has HDTV broadcast surround sound audio quality.

AAC music files of **mH3-Signature Sound** can be played back on Android (Jelly Bean 4.1 and later versions) and iOS smartphones and tablets as well as Windows and Mac OS using native, built-in AAC Multichannel decoder. Devices can be conveniently connected for playback in the living room either over HDMI or wireless over Miracast (WiFi Alliance Standard).

- file download to: PC/Mac & mobile device
- connect via: HDMI cable

- Signature Sound Apps on Android/iOS smartphones and tablets as well as Windows and Mac OS can use native, built-in AAC Multichannel decoder proven broadcast HDTV quality surround sound
